

ELVIS

A QUICK INTRO.

Elvis is an integrated agency that just loves people.

We are fascinated by the way they behave when they meet brands. And we also know people and markets aren't static. They grow, they change – they are Live. So to understand this, we create tools that provide us with what we call 'Live Intelligence'.

Through this, we create more insightful work. Work that engages and activates people in their everyday life, which in turn delivers better results for all our clients. Our core disciplines are Integrated, Direct, Digital, Shopper and Experiential Marketing.
